### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

### DETAILED ACTION

This Office Action is responsive to the applicants' amendment filed on July 31, 2007.

Claim 1 has been amended. Accordingly, claim 1 is pending in this application.

Applicants' cooperation in correcting the informalities in the specification is appreciated.

#### *Election/Restrictions*

1. Claims 2 and 3 withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on April 2, 2007.

#### *Claim Rejections - 35 USC § 103*

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Art Unit: 3748

2. Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Sawai (Publication Number JP 02-283887) in view of Nosaka et al. (Nosaka) (Publication Number JP 07-145785).

Regarding claim 1, as shown in Figs. 1 and 2, Sawai discloses an electric internal gear pump integrated with motor comprising: a rotor portion including an outer rotor<sup>10</sup> having an inner gear, and an inner rotor 9 having an outer gear meshed with the inner gear; an electric motor 2 portion for driving the inner rotor into rotation; and a main shaft 18 comprising a drive shaft 17 of the electric motor portion and a rotary shaft 18 of the inner rotor 9, the drive shaft and rotary shaft formed coaxially and integrally, the main shaft supported only by first and second bearings 13, 23 disposed on axially opposite sides thereof, the rotor portion located between the bearings 13, 23. However, Sawai fails to disclose the bearings being roller bearings.

As shown in Fig. 1, Nosaka teaches that it is conventional in the art to utilize the bearings being roller bearings 6, 7. It would have been obvious to one having ordinary skill in the art at the time the invention was made, to have utilized the roller bearings, as taught by Nosaka in the Sawai apparatus, since the use thereof would have rotatably supported the drive shaft.

***Prior Art***

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure and consists of four patents: Hill (U.S. Patent Number 1,682,54), Auger et al. (U.S. Patent Number 2,153,360), Specht (U.S. Patent Number 4,492,539), and Nakano et al. (U.S. Patent Number 7,040,875), each further discloses a state of the art.

Art Unit: 3748

***Response to Arguments***

4. Applicant's arguments with respect to claim 1 have been considered but are moot in view of the new ground(s) of rejection.

***Conclusion***

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
